Professional Activities

Current Grant Funding

Expansion of MAT Practice in New York State 06/01/17 – 05/31/19
NYS OASAS H79TI080223 (Prime: SAMHSA) \$750,000
This one year project involves focus groups and a statewide survey of physicians, nurse practitioners, and physician assistant to understand barriers to buprenorphine training in these groups. Training of these groups in 9 areas across New York State will be conducted and mentoring networks will be established.
Co-investigator

Cutting the Risk of Colorectal Cancer by Developing Novel, Evidence Based, Community Based Program or Increasing Screening Uptake in Black Males 6/01/2017-7/31/2018
(PI-Lackner) CTSI-Pilot Studies Program, University at Buffalo \$45,000
To examine perceptions and attitudes related to CRC screening among eligible AA men by conducting a qualitative study that assesses barriers and facilitators of CRC screening options. We will conduct focus groups at 3 barbershops in New York City and 3 barbershops in Buffalo, NY, with a total of 30-60 men. The focus groups will explore barriers and facilitators related to CRC screening, and potential acceptability of different noninvasive methods including capsule endoscopy (Pill Cam).
Co-investigator

Past Grant Funding

Alcoholic Energy Drinks and Bar Violence 6/1/2014-11/30/2014
(PI - Miller) BDAA, RIA-University at Buffalo \$29,021
The objective of this pilot research is to lay groundwork for a larger, externally funded study examining mechanisms linking the use of alcoholic energy drinks (AEDs) and bar violence among U.S. young adults.
Co-investigator

Alcohol, Relationship Conflict, and Intimate Partner Violence 07/01/07-06/30/13
(PI - Testa) NIAAA R01 AA016127 \$1,223,089
The research addresses the proximal relationship between alcohol consumption and relationship aggression among a community sample of young married and cohabiting couples in both laboratory and natural settings.
Co-investigator

Binge Drinking in Couples and Intimate Partner Violence 04/01/07-03/31/13
(PI - Leonard) NIAAA R01 AA016829 \$1,662,973
This project involves a three wave longitudinal study designed to examine husband and wife binge drinking as prospective predictors of verbal and physical marital aggression.
Co-investigator

Musicians Self-Image Concept and Lifestyle (MuSICAL) Study 11/15/07-04/30/08
(PI - Miller) RDP, RIA-University at Buffalo \$19,500
The goal of this project was to examine links among personality, music-related identities, and substance use in amateur and professional musicians. Survey data from a sample of Western New York musicians revealed associations among sensation-seeking, musical genre, and illicit drug use.
Co-investigator

Alcohol and the Activation of Aggressive Thoughts 4/1/2003-3/31/2007
(PI - Quigley) NIAAA K AA013103 \$387,700
Scientist Development Award with the goals of examining the structure of alcohol expectancies regarding aggression and how those expectancies, when combined with intoxication, can influence the activation of aggressive cognitions.
